

Mahasurvey: GIS Portal

Detail Responsibilities for Surveyor:

In this project we need to undertake house to house property survey using Smartphone based solution and upload it on cloud based storage. Surveyor will act as the **independent surveyor** for the allocated area of survey. Surveyor would be paid based on the survey completed by him and quality of survey assessed by quality team. Based on Successful completed surveys Surveyor will raise the invoice and Payment will get credited in bank account directly from company. There will be daily update on the accepted work and equivalent amount accumulated towards it to be credited.

Key functions for surveyors:

- 1) Register online and keep profile up to date for personal and bank details so that your payment will be directly credited in your bank account.
- 2) Understand and learn the project and process of survey
- 3) Learn Smartphone based application to undertake the field survey
- 4) Procure and learn required instruments required for the field survey
- 5) Learn on how to use Disto-meter and other instruments to perform measurement of property
- 6) Conduct House to House property survey and submit online data on each survey completed
- 7) Perform Survey Corrections data on feedback from Quality Control team
- 8) Follow all the instructions received to conduct safe and secure survey
- 9) Plan and execute survey Independently based on the allocated area by supervisors.
- 10) Communicate and resolve any challenges faced during survey with supervisor
- 11) Conduct surveys efficiently to get eligibility for incentive scheme on most successful surveyor.
